Allowable Subject Matter

1. Claims 1-10 are allowed.
2. The following is an examiner's statement of reasons for allowance:
3. The prior arts of record do not anticipate or render obvious to one skilled in the art an illuminator comprising a planar light source having a reflectance of from 50 to 90% with respect to light in a state in which the light is emitted from a light source provided separately from the planar light source and incident on the planar light source unit in a non-emission state in which the planar light source is turned off and a reflective polarizer disposed on the exit side of the planar light source unit.
4. Conventionally it is known to have a planar light source and a reflective polarizer being disposed on the light exit side of the light source. Further, the newly cited reference, USPAT 6,163,351 discloses a backlight for a liquid crystal display wherein the backlight comprises a polarization reflection film provided at the end face of the light guide plate. However, the limitation such as a planar light source having a reflectance of from 50 to 90% with respect to light in a state in which the light is emitted from a light source provided separately from the planar light source and incident on the planar light source unit in a non-emission state in which the planar light source is turned off, is not taught or suggested by any of the prior art references and thus considered novel.
5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
